# PRINCIPAL MESSAGE

**I.S.NARWAL**

A school plays a crucial role in shaping a child's future. Not only does this include the provision of education and ensuring learning, but moulding the character, morals, and value system of the child as well. A school provides the foundation needed to view the world as a limitless space providing innumerable opportunities to shine.

We, at SBS, strive to provide education that explores, challenges, and grooms every aspect of the child's personality. While we are determined to provide seamless learning targeted towards excellent academic performance through the incorporation of the latest teaching approaches, we also ensure that we are actively working on the physical, social, emotional, and spiritual training of our children. We believe that all children can learn and commit to nurturing the potential in each child. We focus on contextual learning based on a constructivist theory of teaching & learning to provide techniques such as problem-solving, learning by doing & inquiry-based learning activities. Our teachers help students to test their ideas, draw conclusions & inferences in a collaborative learning environment which transforms the students to become active participants in the learning process.

Our teachers are professionally equipped to develop adapt and modify curriculum content, pedagogy & assessment which suit the needs and aspirations of our students. We work towards a holistic, experiential, integrated, student-centered educational system that helps to improve the creativity, critical thinking, and problem-solving skills of our young learners to equip them for the ever-changing employment dynamics and global ecosystems. We educate our children to change the world through peace, empathy, and fraternity and place great emphasis on inner values.

At our school, we truly believe that "Every child is a star, and we know how to make that star shine." Each student is blessed with unique abilities, strengths, and learning styles. Our aim is to recognize these differences and prepare every child according to their individual abilities so they can become the very best version of themselves. We provide a balanced and supportive environment where students excel not only in academics but also in sports, drama, IT, and various co-curricular activities. By offering diverse learning opportunities, we help each child discover their interests, build confidence, and develop essential life skills.

Our dedicated team of educators works closely with students to guide them, inspire them, and nurture their overall growth. We believe that when children are given the right direction, encouragement, and resources, they shine brightly in every field they choose.

Together, let us continue to support our children so they grow into confident, talented, and responsible individuals.

## Transforming Computer Education with AI and Robotics Curriculum

The Skillful Minds Program, aligning with **NEP 2020** and **NCF 2023**, transforms technology education for **classes 1 to 8**. It blends the **CBSE curriculum with AI and coding (Skill Subject Codes 417 and 843)**. Students and teachers develop essential **21st-century skills** with **hands-on** AI lab activities. The focus is on **activity-based learning** with real-world applications that turn traditional computer labs into innovative learning hubs.
